

ROOFING AND SHEET METAL, SIDING

The examination for **Roofing and Sheet Metal, Siding** consists of 50 multiple-choice questions covering the various types of roofing applications. The reference materials listed below should be helpful to candidates in preparing for this examination. This list, however, is **not** intended as a list of required reading for the examination. Also, these materials may **not** contain all of the information needed to be competent in this trade or to pass the examination. We try to keep this list current and consisting of industry-standard materials. Please note, though, that some of these references may go out of print or be unavailable. *This reference list is just a representative sample of the available materials that contain useful information.* Some of the books below may overlap in much of the material contained. Therefore it is suggested that you might consult any two or three of the books below, or similar references. These books may be available through your library's stock or through your library's service called **Inter-library Loan**. These books may also be available by ordering through a bookstore or directly from the publisher if still in print.
